Education

Carnegie Mellon University (CMU)

08/22 - Expected: 05/27

Robotics Institute, School of Computer Science

Ph.D. in Robotics

Advisor: Dr. Artur [Dubrawski](#)

Research Interests: Machine Learning (ML), Physics-Informed Deep Learning, Forecasting

Relevant Coursework: Intermediate Statistics, Probabilistic Graphical Models, Advanced Intro to ML

Duquesne University, Rangos School of Health Sciences

05/22

Summa Cum Laude

B.S., Biomedical Engineering with Minor in Mathematics

Research Experience

CMU, Robotics Institute, [Auton Lab](#)

Advisor: Dr. Artur Dubrawski

Research Intern (hired between RISS summers)

08/20 - 08/22

- Co-developed the [auton-survival](#) code package with Chirag [Nagpal](#) and demonstrated the application of Propensity Adjusted Treatment Effects and Counterfactual Survival Estimation to provide insight into the effect of geographic region and confounding factors on breast cancer mortality rates.
- Developed ML models using time series patient data recorded during cardiac surgeries. The models demonstrate improved risk predictions for multiple postoperative outcomes, including mortality, compared with the baseline Society of Thoracic Surgeons (STS) models deployed nationally.
- Conducted research on Federated Learning and Knowledge Distillation algorithms to improve ML models for institutional organizations with data privacy and communication bandwidth constraints.

Robotics Institute Summer Scholars ([RISS](#)) Program Researcher

06/20 - 08/20, 06/21 - 08/21

- Improved the reliability of algorithmic rule learning using non-parametric ML algorithms. Rule learning was demonstrated to identify beneficial model transfer opportunities between healthcare sites.
- Developed a ML model that demonstrates the ability to identify patients at higher risk of postoperative renal failure with the inclusion of patient parameters recorded during operation.

Duquesne University Biomedical Engineering Department Lab

Advisor: Dr. Benjamin Goldschmidt

Assistive Technology Project Co-Lead

01/19 - 05/19

- Designed and 3-D printed an assistive device to facilitate tasks for those with grip disabilities due to stroke or other hand injuries.
- Designed and printed an assistive device for a disabled faculty member to facilitate instruction with hand-held medical tools.

Other Lab Experience

The Citizen Science Lab

05/19 - 08/19

Curriculum designer and instructor of STEM lessons and experiments for K-12 students.

Achievements and Awards

Honorable Mention for application to the National Science Foundation Graduate Research Fellowship Program (NSF GRFP), 2024. [\[Awardee List\]](#)

Nominated and accepted to the Undergraduate Consortium (UC) mentorship program at the Thirty-Sixth AAAI Conference on Artificial Intelligence (AI) (AAAI-22).

Student panelist for the 2021 Artificial Intelligence and Data Science Education Leadership meeting hosted by [CSforAll](#) and supported by the White House Office of Science and Technology Policy (OSTP) and the National Science Foundation (NSF).

Awarded one of the [2019 John G. Rangos Prizes](#) for Duquesne curriculum proposal that integrated 3-D printing with prosthetic and assistive technology device design for patients.

Skills

Coding Languages/Software: Python, PyTorch, MATLAB, Linux, HTML, Git, LaTeX

3-D Printing: 3-D printer use and maintenance, Autodesk Fusion 360, Ultimaker Cura

Extracurriculars

Volunteer co-lead of a CMU Robotics Institute team developing the [RoboticsEd](#) website for a global initiative to make robotics and AI resources more accessible to educators and their students.

Piano (12 years of study); guitar (6 years of study)

Member of the CMU rock climbing club

Publications and Presentations

Conference Publications
